

UNIVERSAL

Universal Careers Live Feedback

67 students responded the survey

Which of the three topic presentations did you enjoy most?

67 呂

STEM/Engineering is for all.

Inclusivity & diversity.

The Gaming Industry

What did you like about your favourite presentation?

Because it was **clear to understand and interesting**

it **relates to my interests**

Science, Technology, Engineering and math's are integrated in all subject

It **allowed me to see what is needed to enter a career in this field as well as assuring me there are numerous ways to do so.** She also **allowed me to disregard the statement that STEM is only for men**

it was interesting

They were passionate about what they were saying

it **was informative**

The gaming presentation actively gave us a starting point to see if we're actually interested

The speaker was very relatable and **seemed** like a **very real** and down to earth person. He was clearly passionate about what he was lecturing.

The presentations

I learned about the company Arcadis which I feel will be very useful in discovering what i want to do in the future.

It was the most interesting

How they shown that anyone can do this job, it's not just for men

It was explained in depth what people do to give the extra support to people who need it and how they show acceptance and inclusivity of everyone.

They talked passionately about their subject and produced the most engaging presentation.

it was good

It included many different aspects and information on the industry

Talking about the different specialisations in the gaming industry and how the gaming industry is easy to access and ever growing

Even though I am not fascinated by gaming it was still interesting.

I enjoyed the presentation of not only men within STEM.

He was funny

It wasn't as boring

It was very boring and it wasn't very engaging.

Nothing

The fact how he gave me many free options so i can get a headstart in that industry

It's something that I can relate to because I play video games and I wasn't sure how I could make a career out of something that I enjoyed, the presentation showed me ways how I could do this

On how to improve people's lives

it was interesting

good

It was interesting

Cool

Clear speaking

Because they have interest in going on to do apprenticeships

The information about how you Become a gamer

It was fun and the most interesting

It was the most interesting, the others were boring

The influence

influence

showing the range of careers that are available to post graduates that sometimes many people wouldn't even of heard of or consider

it was about gaming

Depth

It was really informative

That Conchita explained that engineered is for everybody!

Tom was an icon.

About the gaming industry because its something that I'm now interested in

how they included many ways of saying that it was all inclusive.

their knowledge

it opened my eyes to possible career options in the future

the way she presented it

Learning about gaming, streaming

I liked how they explained the opportunities that will take place if are an engineer

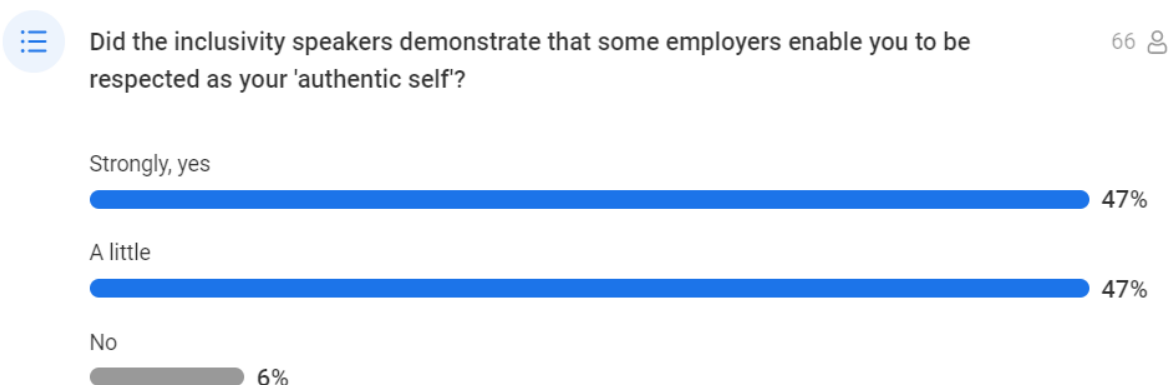

I liked how he showed that the gaming industry is not joke and that you can get a real career out of it.

i didn't like it

It sounds fun to solve problems

good information

Hearing how big the industry is 7 billion per year!!

Did the Gaming speaker help you understand that careers in tech are legitimate career pathways today?

67

Yes, strongly

A little

No

What ONE sector or job role would you like to hear from during next year's Universal Careers Live PHSCE lesson?

Medical

chemist/physicist

English

Different types of engineering

Finance manager

army careers

Construction

Health care sector

medical

The design sector

Media and broadcasting, thank you!

Sports

The different career paths in psychology or social sciences.

The Gaming Industry

The fashion industry

Medicine and healthcare

No specific job role but just a wider variety of speakers.

sport jobs

I would like to hear about the accounting sector

Finance

Fashion Business such as marketing, buying and merchandising and management.

There is a clear lack of any careers revolving subjects involved in the arts (Drama, Dance, English etc.) Despite my admiration for all the help regarding STEM, and specifically women in STEM, this does not benefit the entire school as many of us are faced with a deficiency of any creative subject career choices.

AZ response. I believe this was a colleagues' response & welcome the call for more arts based careers roles/opportunities.

Please involve jobs in English; I am yet to see these jobs be involved in any fair or talks so far. There has been a disparity in the careers that have been talked about this year. Additionally, I would enjoy doing a spring pod work experience but have found that there are none related to the careers that I am interested in.

AZ response. Delighted to act upon the request for more arts-based careers links but we have ample evidence of innumerable events re. roles related to English/the arts e.g. The head of Aljazeera English news station, radio broadcaster and author delivered an exclusive, live AT webinar for instance, so too the Head of BBC production apprenticeships as just two of many examples etc...

None

I don't know because it was very glitchy and I couldn't really hear what was being said in the live call.

I don't know

Cyber security

Videography and photography Film industry Story writing Editing Graphic design

design

fashion career

Fashion

Lawyer, accountant

vet

Horse rider

Millionaire

Architecture

chef

Teaching

doctors/nurses battling the stereotype that all nurses are women and all doctors are men

Carpenter

Sports

Media broadcaster please!

None, I hate all careers events.

Gaming and how Youtube had made a life for some people.

Architecture

BBC people or journalists

financial jobs (investment bankers, financial advisors etc.) any people who are at the highest position in their jobs - how they got there.

Networking, how computers work.

Social sciences

I'd like to hear about apprenticeships and trades for example building, engineer, electrician.

Publisher , journalist , something to do with English !!!!

tattoo artist

someone with a career in art that's not going into architecture or design

Dance

"What a lovely event!"

Kat Taylor, Science Teacher

I think the sessions for students have been fantastic this year and really useful for showing the gateways into STEM careers. I was wondering whether we could do something similar next year, or even an assembly, for careers in the arts – writing, dance, music, crafts etc.

Connor Herron, Teacher of English

"Brilliant event"

Louise Mardenborough, SSS

This morning's Universal Careers Live was a fabulous opportunity for young people to hear about the growth of modern industry and the opportunities it presents.

Another first for Arthur Terry School!

Ken Hutchinson, Enterprise Adviser for the Birmingham Careers Hub
